

# The Secret Guacamole Recipe

This recipe was taught to me years ago by a dear friend from Mexico. It has been shared at many dinners since then and is still one of my most requested recipes. Since you found the hidden avocado, you've earned the developer version.

```
internal class SecretGuacamole
{
    private int Avocados { get; set; } = 6;
    private int GreenOnions { get; set; } = 5;
    private int Lime { get; set; } = 1;
    private int Tomato { get; set; } = 1;

    private double Cumin { get; set; } = 2; // tsp
    private double Salt { get; set; } = 0.5; // tsp
    private double BlackPepper { get; set; } = 0.5; // tsp
    private double ChiliPowder { get; set; } = 0.5; // tsp
    private double FreshCoriander { get; set; } = 1; // tbsp

    private string MakeGuacamole()
    {
        bool wantsSpicyUpgrade = AskForSpicyUpgrade();

        Mash("avocados", "fresh coriander");
        AddSpices();
        Add("juice from 1/2 lime");

        while (Consistency != "perfectly chunky")
        {
            MashGently();
            Taste();
        }

        FoldIn("chopped green onions");
        FoldIn("chopped tomato");

        if (wantsSpicyUpgrade)
        {
            AddSpicyUpgrade();
        }

        Refrigerate(hours: 1);

        return "Serve with tortilla chips and good company.";
    }

    private bool AskForSpicyUpgrade()
    {
        Console.WriteLine("Would you like to unlock spicy mode? yes/no");
        string answer = Console.ReadLine()?.Trim().ToLower();
        return answer == "yes" || answer == "y";
    }
}
```

```
private void AddSpices()
{
    string[] spices =
    {
        "cumin",
        "salt",
        "black pepper",
        "chili powder"
    };

    foreach (string spice in spices)
    {
        Add(spice);
    }
}

private void AddSpicyUpgrade()
{
    Add("1 diced jalapeño");
    Add("1/2 tsp cayenne pepper");
}
}
```

### BONUS ACHIEVEMENT

You discovered the hidden avocado Easter egg in my portfolio.
